Tools & Platforms: Visual Studio, VS Code, Excel, Access, Git, Database Design, Vibe Coding Applications
Concepts: Web Application Architecture, CRUD Operations, UI/UX Fundamentals, Data Modeling

PROJECT EXPERIENCE

Personal Portfolio Website - Built a personal portfolio site using HTML and CSS in Visual Studio to showcase technical projects. Designed site architecture to support future expansion and deployment. Emphasized clean layout, customization, and professional presentation.

Capstone Project – WordPress Business Website (Year 4 Project) - Led the design and deployment of a WordPress website as a capstone project. Customized themes and plugins to meet functional and branding requirements. Translated business requirements into a functional web solution suitable for a real organization.

SaaS Lawn Mowing Web Application (Year 3 Project) - Developed a SaaS-style website for a lawn care business including service listings, pricing logic, and user flow. Designed database-backed structure to support customer and service data. Focused on scalability concepts, business logic, and real-world application of MIS coursework.

Dental Practice Website (Year 2 Project) - Designed and built a multi-page website for a mock dental practice to simulate a real client-facing business. Implemented responsive layouts, service pages, and contact functionality with a focus on usability. Applied HTML, CSS, and structured content design to meet professional presentation standards.

INVOLVEMENT

Aggie Business Kings Men's Organization	College Station, Texas
Recruitment Chair	Aug 2023 – Dec 2024
Directed recruitment efforts by coordinating outreach initiatives and guiding prospective members through the selection process. Represented the organization at professional networking events to enhance visibility and attract new members. Led community engagement projects that fostered positive relationships with families and small businesses in the Bryan-College Station area.
